RE: Establishment HAS Healthcare Advanced Synthesis SA

Over the past months, Helsinn Advanced Synthesis SA has been working towards splitting out its business from the wider Helsinn Group.

I am pleased to inform you that the legal process to enable this important achievement has now been completed. Therefore, I am delighted to officially announce the establishment of HAS Healthcare Advanced Synthesis and present to you our new company logo:

This transition reflects the growth of our company over the past years and our desire to fully focus on delivering high-quality, exclusive, personalized solutions from the chemical development to the commercialization of APIs to pharma and biotech companies as an independent business.

Our structure remains the same, incorporated in 3B Future Holding SA, controlled by The Braglia Family. We are supported by the same passionate team of Senior Executives with extensive experience and skills in contract manufacturing for the international pharmaceutical industry.

As a valued supplier, our working relationship will remain the same, as we will continue to work closely in partnership.

If you have any questions, please direct these to your contact person within the company.

Best regards,

Waldo Mossi,
Chief Executive Officer
HAS Healthcare Advanced Synthesis SA
